OPEN FIRES

## IT'S AN IMPRESSIVE FEATURE TO INCLUDE WHEN YOU'RE BUILDING OR RENOVATING.

---

There's no better time than when you're building to include a fireplace, it's the feature that always becomes the focus of the home.

Building a full brick fireplace can be hit or miss, but by installing a Jetmaster, there's nothing for you or your builder to worry about. All the builder has to do is a minimal amount of hebel or brickwork around the prefabricated Jetmaster firebox.

When it comes to designing your fireplace, possibilities are endless with a Jetmaster.

Because the Jetmaster system is self contained and so easy to install, it will save you up to half the price of a full brick chimney.

What's even more reassuring is that every Jetmaster is unconditionally guaranteed for 15 years to work beautifully. You get super-efficient heating, no smoking, easy lighting, very little cleaning, plus the warmth and comfort of a Jetmaster fireplace.

## THE BEAUTY & EFFICIENCY OF JETMASTER

---

Only a Jetmaster Universal firebox can burn either wood or gas. This means you can convert your wood fireplace to gas with relative ease by simply removing the log pan and installing one of our efficient pebble, coal or log gas burners. The Universal solid steel firebox is designed to handle the hottest heat, be it an efficient wood fire or an open gas, where Jetmaster offers the highest variable gas inputs at the flick of a switch.

## GRACE AND AMBIENCE OF A JETMASTER DOUBLE-SIDED FIRE

---

A Jetmaster double sided fireplace can make a stunning feature as a room divider or simply be used to divide and heat two separate rooms. Either way you can enjoy round the room comfort of Jetmaster's two-way radiant and convected heat.

## ENJOY THE GREAT OUTDOORS

---

If you love outdoor dining and entertaining then a gas or wood Jetmaster fireplace is the perfect addition to any alfresco area. The fireplace can also be used as a barbecue helping you enjoy your outdoor living year round.

# TIMBER. IT'S RENEWABLE, IT'S SUSTAINABLE, IT'S LOOKING AFTER YOU AND THE PLANET.

*"In terms of limiting net greenhouse gas emissions, firewood is generally more favourable for domestic heating than other non-renewable fossil fuel sources of energy."*

Australian Greenhouse Office Life Cycle Assessment of  
Greenhouse Gas Emissions from Domestic Woodheating

**“ONE OF THE BEST WAYS TO ADDRESS CLIMATE CHANGE IS TO USE MORE WOOD, NOT LESS. WOOD IS SIMPLY THE MOST ABUNDANT, BIODEGRADABLE AND REUSABLE MATERIAL ON THE PLANET.”**

Patrick Moore, co-founder of Greenpeace, Washington Times, January 2006

1. Burning wood in an efficient Jetmaster open fire or a Kemplan slow combustion wood heater produces efficient home heating energy.
2. Carbon dioxide is created by burning wood in fireplaces, bush fires and decomposition. No energy is utilised when wood decomposes or is burnt in bush fires.
3. Carbon dioxide is absorbed by trees when growing.
4. Oxygen is released into the atmosphere resulting in reducing greenhouse gas emissions.
5. Jetmaster supports the Firewood Association of Australia. Firewood merchants accredited by the F.A.A are able to supply sustainable dry fuel for use in efficient approved fireplaces. Use of sustainable dry fuel will not cause adverse air quality.
6. Burning fossil fuels such as coal fired electricity, oil and gas adds to greenhouse gas emissions.

## A JETMASTER BURNER TO SUIT EVERYONE'S TASTE

---

Jetmaster's high variable flame gas burners offer stunning realism, plus you also get stunning heat as well - up to an estimated 6-7kw of heat output and because the flame is variable, you have total control of your gas usage.

All Jetmaster gas burners are Australian Gas Association approved which is your absolute guarantee of safety.

850 pebbles Topaz stainless steel front.  
Suits all 850 series models.  
Gas input high 65mj/hr, low 45mj/hr.

Iron bark 700 flat Nova stainless steel front. Suits 600, 700sh and 700D models. Not suitable for low models.  
Gas input high 55mj/hr, low 39mj/hr.

1050 Topaz pebbles.  
Suits 1050 series models.  
Gas input high 65mj/hr, low 45mj/hr.

Super heat coals with Spanish Black front.  
Suits all 600-850 series models.  
Gas input high 72mj/hr, low 50mj/hr. Not available in LPG.

700 Iron bark logs with Spanish brass front.

850 Iron bark Nova black front.  
Suits 850, 850low models.  
Gas input high 61mj/hr, low 43mj/hr.

Standard coals with picket front.  
Suits 440-700sh model series. Gas  
input high 55mj/hr, low 39mj/hr.

Coal burner with black Nova front

700 Iron bark Sabre  
black front.

## WOOD BURNING OPTIONAL LOG PANS

Standard logpan with picket front

Optional clean face log pan

Log pan with optional  
alfresco cook top
