850 Wood burning

600 with Milano Mantel, marble margins and Iron bark gas logs with Spanish brass front.

Convert your existing fireplace to the efficiency of a Jetmaster wood or gas fire.

Converting your existing fireplace to a Jetmaster wood or gas fireplace dramatically increases efficiency, eliminates smoking problems and transforms your smoky hole in the wall to a beautiful centrepiece. As no flue is required (a Jetmaster will operate beautifully off the existing chimney), the installation is easy and cost effective. You can do it yourself or use our qualified installers. Jetmaster also supplies fascias, extensions, surrounds, mantels, and trims. Everything you need to renew your old fireplace and make it work much better than ever before.

1. Measure the height, depth and width of your fireplace recess.

2. Choose the appropriate firebox from a range of sizes.

3. Installation complete. 700SH with arch nickel fascia, Iron bark gas logs and Brompton Limestone mantel.

# Double Sided Fires

1050 Double sided wood burning.

700 Double sided with Topaz pebble gas fire.

## The Beauty and Ambience of a Jetmaster Double sided fire.

A Jetmaster see through (double sided fire) can make a stunning feature as a room divider or simply be used to divide and heat two separate rooms, either way you can enjoy round the room comfort of Jetmaster's two way radiant and convected heat.

NB: A Half glass panel fixed on one side is recommended for Jetmaster Double sided wood fires to eliminate smoking problems that can occur due to through draft.

1050 wood burning.

## It's an impressive feature to include when you're building or renovating

There's no better time than when you're building to include a fireplace, it's the feature that always becomes the focus of the home. Building a full brick fireplace can be hit or miss, but by installing a Jetmaster, there's nothing for you or your builder to worry about. All the builder has to do is a minimal amount of hebel or brickwork around the prefabricated Jetmaster firebox. Or you can do away with brick work altogether with our zero clearance units. When it comes to designing your fireplace, possibilities are endless with a Jetmaster. Because the Jetmaster system is self-contained and so easy to install, it will save you up to half the price of a full brick chimney. What's even more reassuring is that every Jetmaster is unconditionally guaranteed for 15 years - to work beautifully. You get super efficient heating - no smoking - easy lighting - very little cleaning, plus the warmth and comfort of a Jetmaster fireplace.

700D wood burning with 4 sided black trim.

700SH Freestander (pewter) with Topaz pebble gas fire.

1050 low low wood burning.

## The Beauty of Jetmaster wood and gas fires.

Up to 5 times more heat than a conventional fireplace.

Cool air is drawn into the Jetmaster's super heating chamber. As it heats it rises and is forced out into the room through a jet at the top. The metal insert then radiates brilliantly. This proven two way heating system is the real beauty of Jetmaster. The firebox also incorporates a damper control, which governs the rate of burning, reduces heat loss and maximises overall efficiency, giving up to five times more heat than an average brick fireplace\*.

An optional fan is available for gas.

Screened for safety.

Spark proof and child proof flush fitting clip on screen.

\*Ryerson Polytechnic Institute Toronto Canada. 700D produces 15kw/51,000 BTU'S within 46 minutes when burning wood.

# Beautifully simple gas

850 low with Iron bark logs Nova front.

700D with Luna Polished concrete mantel and Topaz Iron bark logs.

700SH with Classic Nickel fascia, Brompton Limestone mantel, pebbles and Sabre Nickel front.

## Gas fires with more glow, more flame, more heat and more realism at the flick of a switch

No other open gas fire compares with Jetmaster's high variable flame burners. Jetmaster's solid steel firebox is designed to take the hottest fire, be it wood or gas, so Jetmaster can offer you higher variable gas inputs than most other open gas fires, which means unbeatable realism and because the flame is variable you have total control of gas consumption.

# A Jetmaster Universal firebox can burn wood or gas and is easily converted.

Existing Jetmaster wood fire

Logpan removed and a 25mm hole is drilled on the RHS of the firebox.

Burner inserted and connected to fixed gas line.

Installation complete. 850 Low with Iron bark gas logs.

**GAS APPROVED.** Jetmaster gas burners are AGA approved as type 1 appliances.

**WOOD APPROVED.** Jetmaster Fires have qualified for the National Certificate of Exemption for Solid Fuel Heaters. This certificate is issued under Section 14 of the relevant legislation in that the maximum Carbon Dioxide output from the combustion chamber is less than 5% of the volume of the appliance.

"ONE OF THE BEST WAYS TO ADDRESS CLIMATE CHANGE IS TO USE MORE WOOD NOT LESS. WOOD IS SIMPLY THE MOST ABUNDANT BIODEGRADABLE AND REUSABLE MATERIAL ON THE PLANET." PATRICK MOORE, CO FOUNDER OF GREENPEACE, WASHINGTON TIMES JANUARY 2006

## Heat your home and reduce greenhouse gasses

- 1: Burning wood in a Jetmaster open fire produces efficient home heating energy.
- 2: CO<sub>2</sub> is created by burning wood in fireplaces, bush fires and decomposition. Energy is wasted when wood is burnt in bush fires or decomposes.
- 3: CO<sub>2</sub> is absorbed by trees when growing.
- 4: O<sub>2</sub> is released into the atmosphere resulting in reduced greenhouse gas emissions.

- 5: Jetmaster supports the Firewood Association of Australia. Firewood merchants accredited by the F.A.A are able to supply sustainable dry fuel for use in efficient approved fireplaces. Use of sustainable dry fuel will not cause adverse air quality.
- 6: Burning fossil fuels such as coal fired electricity, oil and gas adds to greenhouse.
