Brilliant Heat. Beautiful to Watch.

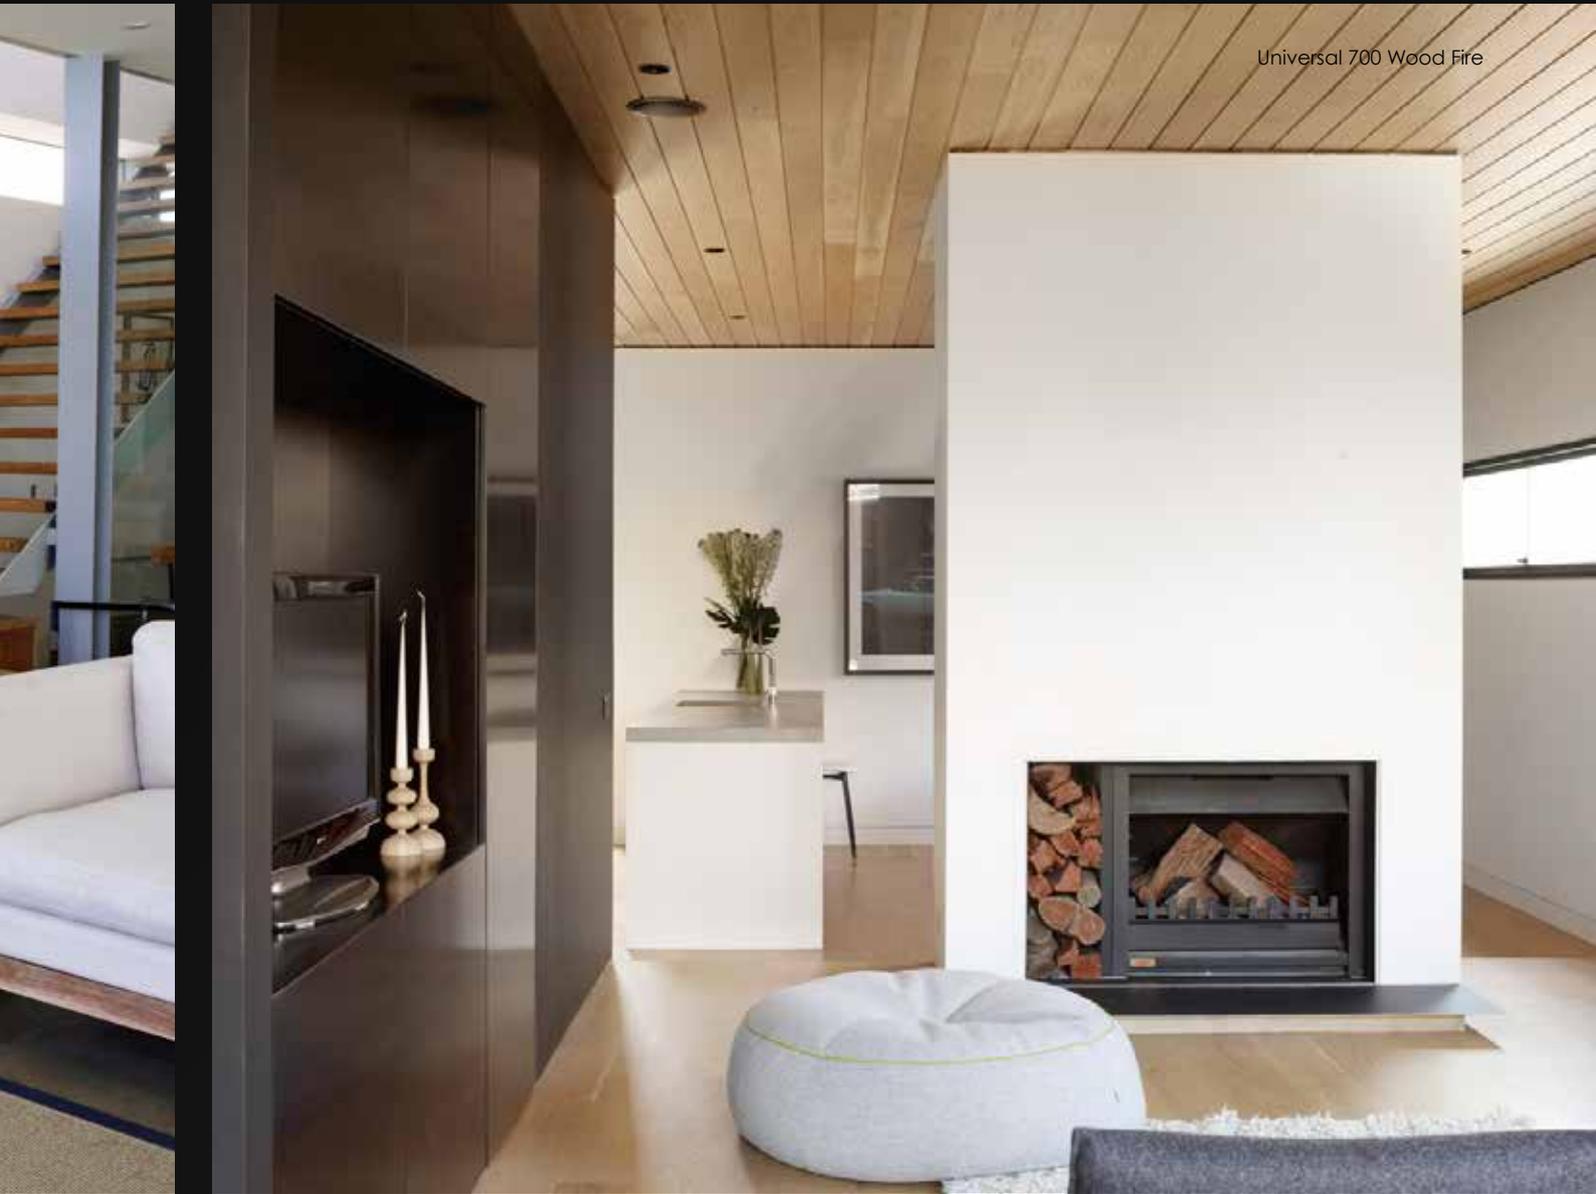

## “ NOTHING QUITE COMPARES TO A JETMASTER ”

Nothing completes your home quite like a Jetmaster fireplace, Australia's market leader in gas and wood fireplaces. For over 35 years we have been committed to revolutionising gas fireplaces combining superior heat efficiency and beautiful design.

Universal 850 Fireplace with Gas Coal Burner, Windsor Mantel, Victorian Fascia and Nickel Spanish Front

## IT'S AN **IMPRESSIVE FEATURE** TO INCLUDE WHEN YOU'RE BUILDING OR RENOVATING.

There's no better time than when you're building to include a fireplace, it's the feature that always becomes the focus of the home.

Building a full brick fireplace can be hit or miss, but by installing a Jetmaster, there's nothing for you or your builder to worry about. All the builder has to do is a minimal amount of hebel or brickwork around the prefabricated Jetmaster firebox.

When it comes to designing your fireplace, possibilities are endless with a Jetmaster. Because

the Jetmaster system is self contained and so easy to install, it will save you up to half the price of a full brick chimney.

What's even more reassuring is that every Jetmaster is unconditionally guaranteed for 15 years to work beautifully. You get super-efficient heating, no smoking, easy lighting, very little cleaning, plus the warmth and comfort of a Jetmaster fireplace.

Gas Coal Burner and Picket Fence Front

## THE **BEAUTY** AND EFFICIENCY OF JETMASTER

Only a Jetmaster Universal firebox can burn either wood or gas. This means you can convert your wood fireplace to gas with relative ease by simply removing the log pan and installing one of our efficient pebble, coal or log gas burners.

The Universal solid steel firebox is designed to handle the hottest heat, be it an efficient wood fire or an open gas, where Jetmaster offers the highest variable gas inputs at the flick of a switch.

Universal 700 Double Sided Wood Fire

Universal 700 Double Sided Gas Fire

## GRACE AND AMBIENCE OF A JETMASTER **DOUBLE-SIDED** FIRE

A Jetmaster see through (double-sided fire) can make a stunning feature as a room divider or simply be used to divide and heat two separate rooms. Either way you can enjoy round the room comfort of Jetmaster's two-way radiant and convected heat.

NB: A half glass panel fixed on one side may be required for Jetmaster double-sided wood fires to eliminate smoking problems that can occur due to through draft.

## ENJOY THE GREAT OUTDOORS

If you love outdoor dining and entertaining then a gas or wood Jetmaster fireplace is the perfect addition to any alfresco area. The fireplace can also be used as a barbecue helping you enjoy your outdoor living year round.

## CONVERT YOUR EXISTING FIREPLACE TO THE EFFICIENCY OF A JETMASTER **WOOD OR GAS FIRE.**

Converting your existing fireplace to a Jetmaster wood or gas fireplace dramatically increases efficiency, eliminates smoking problems and transforms your smoky hole in the wall to a beautiful centrepiece.

As no flue is required (a Jetmaster will operate

beautifully off the existing chimney), the installation is easy and cost effective. You can do it yourself or use our qualified installers. Jetmaster also supplies fascias, extensions, surrounds, mantels, and trims. Everything you need to renew your old fireplace and make it work much better than ever before.

### STEP 1

Measure the height, depth and width of your fireplace recess.

### STEP 2

Choose the appropriate firebox from a range of sizes.

### STEP 3

Installation complete with Universal 600, lain arch fascia standard coals and white MDF Richmond mantelpiece.

Brilliant Heat. Beautiful to Watch.

# A JETMASTER BURNER TO SUIT EVERYONE'S TASTE

Jetmaster's high variable flame gas burners offer stunning realism, plus you also get stunning heat as well – up to an estimated 6–7kw of heat output and because the flame is variable, you have total control of your gas usage.

All Jetmaster gas burners are Australian Gas Association approved which is your absolute guarantee of safety.

850 pebbles Topaz stainless steel front. Suits all 850 series models. Gas input high 65mj/hr, low 45mj/hr.

Iron bark 700 flat Nova stainless steel front. Suits 600, 700sh and 700D models. Not suitable for low models. Gas input high 55mj/hr, low 39mj/hr.

1050 Topaz pebbles. Suits 1050 series models. Gas input high 65mj/hr, low 45mj/hr.

Super heat coals with Spanish Black front. Suits all 600–850 series models. Gas input high 72mj/hr, low 50mj/hr. Not available in LPG.

700 Iron bark logs with Spanish brass front.

850 Iron bark Nova black front. Suits 850, 850low models. Gas input high 61mj/hr, low 43mj/hr.

Standard coals with picket front. Suits 440–700sh model series. Gas input high 55mj/hr, low 39mj/hr.

Coal burner with black Nova front

700 Iron bark Sabre black front.

## WOOD BURNING OPTIONAL LOG PANS

Standard logpan with picket front

Optional clean face log pan

Log pan with optional alfresco cook top

Brilliant Heat. Beautiful to Watch.

## INSTALLING A JETMASTER

Installing a Jetmaster Universal wood or gas fire in a room without a fireplace in just a few easy steps.

### STEP 1

Lay the non combustible base for the firebox.

### STEP 2

Start to build your Hebel or brick casing around the firebox.

### STEP 3a

Install the firebox.

### STEP 3b

Install the gable.

### STEP 3c

Install the flue.

### STEP 4

Complete Hebel or brick enclosure to 600mm above firebox before framing.

### STEP 5

Complete your framing and plasterboard.

The Jetmaster  
complete with your choice of decor.

### STEP 6a

Choose your finishes.

### STEP 6b

Fire away.

# UP TO 5 TIMES MORE HEAT THAN A CONVENTIONAL FIREPLACE.

Cool air is drawn into the Jetmaster's superior heating chamber. As it heats, it rises and is forced out into the room through a jet at the top. The metal insert then radiates brilliantly.

This proven two-way heating system is the real beauty of Jetmaster. The firebox also incorporates a damper control, which governs the rate of burning, reduces heat loss and maximises overall efficiency, giving up to five times more heat than an average brick fireplace.\*

## SCREENED FOR SAFETY

- Spark proof and child proof flush fitting
- hook-on screen.

## TIMBER. IT'S RENEWABLE, IT'S SUSTAINABLE, IT'S LOOKING AFTER YOU AND THE PLANET.

**“One of the best ways to address climate change is to use more wood, not less. Wood is simply the most abundant, biodegradable and reusable material on the planet.”**

*Patrick Moore, co-founder of Greenpeace, Washington Times, January 2006*

1. Burning wood in an efficient Jetmaster open fire or a Kemplan slow combustion wood heater produces efficient home heating energy.
2. Carbon dioxide is created by burning wood in fireplaces, bush fires and decomposition. No energy is utilised when wood decomposes or is burnt in bush fires.
3. Carbon dioxide is absorbed by trees when growing.
4. Oxygen is released into the atmosphere resulting in reducing greenhouse gas emissions.
5. Jetmaster supports the Firewood Association of Australia. Firewood merchants accredited by the F.A.A are able to supply sustainable dry fuel for use in efficient approved fireplaces. Use of sustainable dry fuel will not cause adverse air quality.
6. Burning fossil fuels such as coal fired electricity, oil and gas adds to greenhouse gas emissions.

## GAS APPROVED

Jetmaster gas burners are AGA approved as type 1 appliances.

## WOOD APPROVED

Jetmaster Fires have qualified for the National Certificate of Exemption for Solid Fuel Heaters. This certificate is issued under Section 14 of the relevant legislation in that the maximum Carbon Dioxide output from the combustion chamber is less than 5% of the volume of the appliance.

## THE JETMASTER GUARANTEE

Provided the Jetmaster Fireplace is installed according to Jetmaster instructions and a Jetmaster receptacle is used for fuel burning, the unit\* is unconditionally guaranteed for a period of 15 (fifteen) years (excluding rust) from the date of installation of the fireplace.

\*Not including the log pan, glass doors or gas burner.

## Jetmaster Double Sided
