Modern elegance.

Brilliant Heat. Beautiful to Watch.

POLARIS

Polaris 620E

Polaris 620E

Polaris 620E

The Polaris electric range offers a stunning ultra-realistic flame, which has been achieved by carefully modelling the fuel bed from actual logs sourced from woodlands.

The 620E model is suitable for existing fireplaces or new built applications and is ideal for apartments or homes where a flue cannot be installed.

This compact and versatile electric fireplace can be styled with a traditional mantelpiece or a contemporary flat black or stainless-steel trim.

Features:

- Realistic flame effect. Choice of 3 flame colours
- 5 flame speeds
- Active glowing ember fuel bed: 5 brightness settings
- 13 different colours
- Setting that cycles through all options above
- Hand painted logs as standard. No logs are repeated in a set, genuinely realistic look
- The fuel bed also includes embers and bark
- LED technology means low running costs and long life usage
- Anti-reflective window on front and sides as standard
- Accurate room temperature control
- Remote thermostat in hand remote
- 1-2kW adaptive control (on board energy manager)
- Daily and 7-day Programmable Heating

Each model in the Polaris range can easily be configured for single sided, two sided or three-sided applications.

You can create a fire look, which is completely unique. Whether that's toning down the flames to showing red-hot embers on the fire bed, or maybe you want a strong, fast flame (there are 5 flame speeds) to warm a room on a cold evening - it's totally up to you.

Polaris 1000E with limestone slips

Polaris 1000E in three sided configuration

Polaris 1000E

The Polaris electric range offers a stunning ultra-realistic flame, which has been achieved by carefully modelling the fuel bed from actual logs sourced from woodlands.

The 1000E is the middle-sized Polaris fire that like the others can be installed in many ways; one sided, two sided or three sided.

Features:

- Realistic flame effect. Choice of 3 flame colours
- 5 flame speeds
- Active glowing ember fuel bed: 5 brightness settings
- 13 different colours
- Setting that cycles through all options above

Polaris 1600E in three sided configuration

Polaris 1600E in two sided configuration

Polaris 1600E

The Polaris electric range offers a stunning ultra-realistic flame, which has been achieved by carefully modelling the fuel bed from actual logs sourced from woodlands.

At 1.6 metres wide, the 1600E is ideal for large feature walls and room dividers. Imagination is the only limit to what can be achieved when installing these fires.

This image shows a single sheet of white paper with horizontal ruling lines, resembling notebook paper. The paper is centered and takes up most of the frame. It has ten evenly spaced horizontal lines. The paper is surrounded by a thick black border. On the far left edge, there is a vertical orange bar. At the top left corner, outside the main white area, the word "NOTES" is written in large, bold, black capital letters.
