

# Kemlan Super Nova

Supernova is easily installed into existing fireplaces

Before installation

## Convert your existing fireplace to the unrivaled efficiency of a Supernova Insert.

A Supernova Insert offers the ultimate in versatility with an adjustable depth - as shallow as 300mm and a 45 degree back and flue outlet which allows for various flue positions. Increase the efficiency of your open brick fireplace by five times.

## Make your Kemlan Supernova Insert the centrepiece of your home.

With kemlan the choices are endless in creating a beautiful centerpiece all you have to do is fire your imagination include a four sided stainless steel or black trim or choose from our range of modern or olde style mantelpieces and fascias. Not only does the Supernova provide a stunning feature it also offers impressive efficiency of 63% with an average peak output of 14.9kw per 2.4kg/hr wood consumption. Kemlan heaters burn safely with the flame behind a strong ceramic glass door. The glass door remains clean throughout the life of the fire by an advanced airwash system designed within the firebox.
